

ASIMO

The Honda Humanoid Robot ASIMO

Robots

Honda have
created a
humanoid robot
called Asimo

Asimo weighs 130kg
which is the same
as a 20 stone
person.

His body is made
from very lightweight
and tough
magnesium alloy

His nickel-zinc
battery allows for
25 minutes of
operation

Asimo cost over
\$15 million to make
and the costs
are still rising!
