_____ is used to provide instructions to the computer so that it can perform certain tasks. It is needed

Without software, the computer will not _____.

Examples of computer software are:

1. _____
2. _____
3. _____
4. _____

Challenge:

Write down the extra fact that you found out about hardware:

Write down the extra fact that you found out about software:

TASK 2: PERIPHERALS

In your own words, explain the term 'peripheral'

Write down the extra fact that you found out about peripherals:

On the picture below, draw an arrow to the peripherals and label them.

TASK 3: BITS AND BYTES

The name of the smallest unit of data which can be stored is a _____

8 bits of data are called a _____

What is the storage size of this word: computer _____

TASK 4: STORAGE SIZES

Put the following into the correct order of size:

Megabyte

Byte

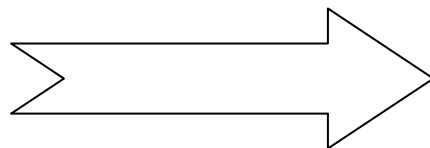

Gigabyte

Kilobyte

Bit

Smallest _____

Largest _____

Answer the following questions:

A Kilobyte is equivalent to _____ bytes

A Megabyte is equivalent to _____ Kilobytes

A Gigabyte is equivalent to _____ Megabytes

Are the following statements true or false?

Statement	True	False
A film stored on DVD would be around 50 Kilobytes in size		
An email to a friend would probably be less than 100 kilobytes		
A web site would probably be around 30 Kilobytes
