

TYPES OF COMPUTER

Across

- 2. Personal Digital
- 6. PDAs and Palmtops have a long life compared to a laptop
- 7. Desktop PCs are large and heavy, which means they are not as as a laptop
- 8. This tends to be small and cramped on a PDA or Palmtop
- 9. A supercomputer usually requires its own generator to ensure that it can continue to work if a power failure occurs
- 10. The atmosphere around a supercomputer must be kept free of dust particles, so special air have to be installed.

Down

- 1. Whilst they are working, supercomputers generate so much heat that an conditioning system is required
- 3. Because of their limited capacity, PDAs and Palmtops need to be backed up regularly onto your main PC.
- 4. This type of computer is usually build with all the functionality of a PC but as one complete unit.
- 5. These are the fastest and most expensive computers in the world
